

# VRT Patient Results\*

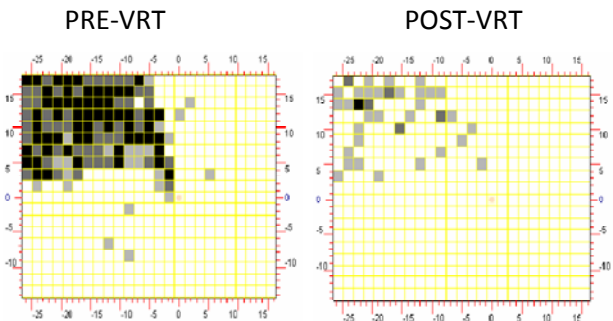

**SL – West Palm Beach, FL, 90**  
**18.08% improvement**  
**Began VRT 6-years post-TBI**

“As a physician, I was taught that central nerve injury could never be repaired. The improvement in my peripheral vision is truly amazing and has afforded me activities that I would not have attempted previously. To say that I have been thrilled by this benefit of therapy would be an understatement.”

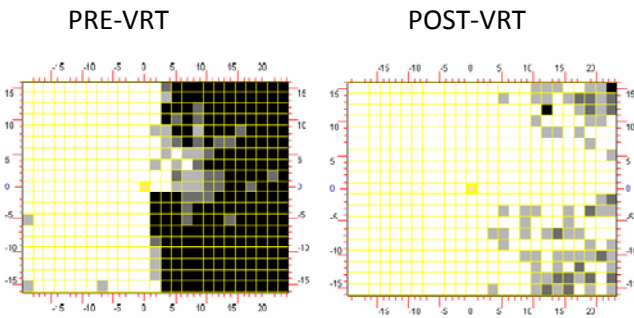

**LR – LaGrange Park, IL, 47**  
**17.5% improvement**  
**Began VRT 3-years post-stroke**

“I did six months of therapy and was encouraged by the improvement as I continued. Since I was still improving, I committed to an additional three months. It is wonderful that a treatment is now available that can provide you with real benefits.”

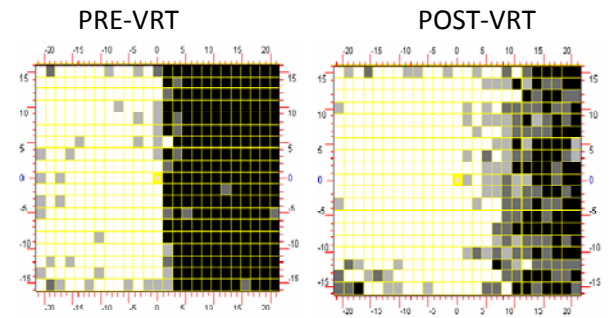

**JW – Clearwater, FL, 58**  
**38.5% improvement**  
**Began VRT 5-years post-stroke**

“I performed NovaVision VRT twice daily for nine months. My vision improved so I can now read menus at restaurants and directional signs inside airport terminals when traveling. I enjoy watching TV because I no longer miss out on any of the action. I can appreciate my art collection like I could before my stroke.”

**LA – Gilbert, AZ, 20**  
**20.0% improvement**  
**Began VRT 6-years post-TBI**

“VRT opened up so much more of my vision for me. I went from seeing 50% to seeing 70%. I can now enjoy walks with my husband and play with my daughter. The 20% improvement made a big difference to me. I gained so much from vision restoration therapy.”
